Erth produces high quality natural stone veneers. This is our passion and what we do best. It’s no wonder that we are the preferred brand of many renowned designers, architects, builders, renovators, and DIYers in North America.
Cascade

The Cascade series consists of light-weight and easy to install planks designed to create a sense of harmony and dramatic appeal. The stone is worked by hand to create a surface texture made up of a cascade of natural indentations resembling water ripples. The unique surface treatment allows the stone to blend with its surroundings.

APPLICATION
Feature Wall, Fireplace, Landscaping Feature

**MORTAR**
Mapei Ultraflex 2 White or Mapei® Ultraflex™ RS

**SEALER & ENHANCER**
Professional grade natural stone sealers and enhancers may be used on ErthCOVERINGS stone veneers.

**GROUT**
Unsanded grout as required for grouted joints only.
The Large Strips series builds upon the much celebrated Strips series by introducing a larger format unique to ErthCOVERINGS. The Large Strips series presents the same clean, sharp lines and amazing shadow effects but in a format that lends itself best to large projects with emphasized scale. Experience the same naturally occurring striations and intricately-formed patterns present in every piece but on a larger scale.

Professional grade natural stone sealers and enhancers may be used on ErthCOVERINGS stone veneers. Colour enhance/enhancing sealers cannot be used on BH-LRP

SUGGESTED LARGE STRIPS LAYOUT
The following diagram represents our suggested layout for the Large Strips series. However, the strips can be arranged any way you’d like – even vertically.

The vertical layout of strips in each row shows this pattern: 6”, 2”, 4”, 6”, 2”, 4” etc.
It is best to keep all vertical rows with the same height of stones.
The horizontal layout of this product in length and thickness will always be RANDOMIZED.
It is therefore up to the installer’s creative discretion to determine the most aesthetically pleasing design.

Mountain Ledgestone

Our Mountain Ledgestone Series is the ideal stone for those looking to add the warm and homely feeling one gets when driving up to a mountain lodge. Whether for the interior fireplace or exterior facade of the home, this stone is rustic and raw. With a rugged face and natural hewn edges, this series of stone is as natural and raw as it gets.

The Pebble collection channels the most elemental characteristics nature has to offer. Centuries of slow erosion caused by turbulent water transforms each stone until it is rounded and smooth to the touch. Delightful to the senses, the Pebble collection is extremely versatile in its range of applications.

Our Splitface Series of natural stone is produced by craftsmen in a manner that allows for easy installation and a multitude of design possibilities, from rustic to contemporary.
CORNER CONFIGURATIONS

The Splitface series uses two distinct corner configurations depending on stone type. The Durango Splitface and Blustone Splitface use seven differently sized 90° corner pieces. The Dover Splitface and Fossil Splitface stones use natural edge corner pieces (see below).

90° Splitface Corner (70SPF-C & 90SPF-C)

With clean sharp lines and amazing shadow effects, our strips series are our most sophisticated creation. Precise cuts allow for easy installation of this contemporary series of natural stone.
The following diagram represents our suggested layout for the Strips series. However, the strips can be arranged any way you’d like – even vertically.

**SUGGESTED STRIPS LAYOUT**

The vertical layout of strips in each row shows this pattern: 3", 1", 2", 3", 1", 2" etc. It is best to keep all vertical rows with the same height of stones.

The horizontal layout of this product in length and thickness will always be RANDOMIZED. It is therefore up to the installer’s creative discretion to determine the most aesthetically pleasing design.

Chembond® MagniFlex® Super 8820 or Mapei® Ultraflex™ RS

CW-RP must be installed using a white mortar to avoid staining. SF-RP and BH-RP must be installed using a rapid-setting, thin-set mortar.

**SEALER & ENHANCER**

Professional grade natural stone sealers and enhancers may be used on ErthCOVERINGS stone veneers. Colour enhancers/enhancing sealers cannot be used on BH-RP.
Coral White Strips
CW-RP

Silver Fox Strips
SF-RP
**CHEMBOND® MORTAR**

Chembond Magniflex Super 8820 is an economical high-performance multi-purpose polymer modified mortar suitable for both wall and floor applications. This mortar achieves initial set in 16 to 24 hours and has an excellent bond capacity. ErthCOVERINGS® recommends this mortar for all applications not requiring a fast setting mortar. Please read product data sheet for more information.

**MAPEI® MORTAR**

Mapei Ultraflex RS is a premium grade high-performance rapid setting polymer modified mortar suitable for both wall and floor applications. This mortar achieves initial set in approximately 1 hour. ErthCOVERINGS® recommends this mortar for all stones that may be stained by a regular multi-purpose mortar or for floor installations that must be ready for use in a short period of time. Please read product data sheet for more information.

**ABP® RAINSCREEN**

Mortairvent employs innovative rainscreen technology that equalizes the air pressure within the wall system by creating a ventilation cavity between the weather resistant barrier and the exterior wall. The polymer-core mesh creates the airspace that allows excess moisture to drain and not remain in the wall system. ErthCOVERINGS® highly recommends the use of Mortairvent for all exterior applications. Contact ErthCOVERINGS® for more information.

I have used ErthCOVERINGS stone veneers in several Income Property renovations. We have had stellar results and the quality of the product has contributed to the overall value of the renovations.

— Scott McGillivray, Income Property - HGTV

We love using ErthCOVERINGS products. They look great and install easy.

— The Love It or List It Team - W Network

ErthCOVERINGS has one of the most unique stone and tile lines in the design industry. It is always great to work with such an innovative and professional company such as ErthCOVERINGS.

— Barbara K, Candice Tells All - W Network
